PROFILE

Full Stack Developer with strong experience building scalable web applications, SaaS platforms, and RESTful APIs using PHP, and Laravel. Skilled in the full development lifecycle, from designing intuitive user interfaces to optimizing backend performance and database interactions. Complemented by experience as a Data Analyst, translating complex datasets into clear insights that support product decisions and business growth.

WORK EXPERIENCE

LifeSeed Worldwide - Nyanya, Abuja 2021 - 2025

Developer/programmer

- Developed and maintained web applications and software features using relevant programming languages and frameworks.
- Collaborated with team members to translate business requirements into clean, efficient code.
- Debugged and tested applications to ensure performance, reliability, and good user experience.

LifeSeed Worldwide - Nyanya, Abuja 2025

Tutor / Instructor

- Taught the basics of programming to beginners using HTML, CSS, and JavaScript, focusing on practical, hands-on exercises.
- Guided students in creating simple web pages and interactive projects to reinforce core concepts like structure, styling, and behavior.
- Provided clear explanations and step-by-step support to help learners build confidence in web development fundamentals.

LifeSeed Worldwide - Nyanya, Abuja 2023 - 2025

Data Analyst

- Collected and cleaned business and operational data using Excel for accurate reporting and analysis.
- Created summary tables, charts, and dashboards in Excel to visualize trends, performance metrics, and key results.
- Engineered dynamic Pivot Tables and interactive dashboards to track performance metrics, enabling leadership to identify key market trends.
